TerraMedia Message Filtering

"TerraMedia is software that lets you eliminate all unwanted messages at the server level without receiving them with your client."

Key Modules:

- Keyword Filter Manger
- Complex Filter Manager
- DNSBL Filter Manager
- Bayesian Filter manager
- HTML Validator
- Whitelist Manager
- Blacklist Manager
- Block Country of Origin

Benefits:

- Legitimate messages received for safe content processing.
- Blacklist guarantees up to 94% filtering of mail traffic coming from suspicious sources.
- TerraMedia Message Filtering guarantees detection of bulk messaging & its source
- Flexibility and the possibility to fine-tune the settings. Systems utilizing this technology can easily adapt to new types of spam and rarely make mistakes in distinguishing spam from legitimate email traffic.
